Mission Statement

Kerberos International delivers outstanding value to the warfighter and other customers by providing innovative, cost effective Cyber and Electromagnetic Spectrum technology and communication solutions tailored to meet specific mission requirements worldwide.

Differentiators

- We combine senior engineers offering experience developing military communications solutions with **savvy military and intelligence field operators** to deliver innovative solutions that **work in battle**.
- **Highly satisfied, repeat customers**
- We are a **lean, highly responsive provider focused on customer satisfaction**.
- We **specialize in high performance, low-cost, small SWaP solutions** that leverage the world's most cutting edge technology.

Core Competencies

Portable C⁴/ISR and EW Solutions

Customized, man-portable, comms solutions. Robust remoteable, multi-function, multiband, full spectrum, collection, direction finding (DF) and HF/VHF/UHF surveillance and attack systems. Support for radio, satellite, telephone, Internet, video, GPS, RFID and specialized hardware & software. Ruggedized and capable of operating in the most austere environments using various power sources.

Advanced RF Engineering & Analysis

Delivered by senior radio frequency (RF) engineers, analysts, designers with military experience and electronic warfare combat veterans.

Advanced Cyber & Social Media Training

Advanced tools and services to provide cyber training including realistic, virtual environments to simulate any complex network (wired or wireless) and user traffic including web browsing, email and social media site postings. Offensive and defensive capabilities.

Expert instructors available.

IT Services

- **Software/Hardware Engineers**
- **Integration & Post Production Support:** mobile, cloud, legacy modernization
- **IT Life Cycle Support:** training, testing, help desk
- **Network design and installation:** wired/wireless, indoor/outdoor

Security and Protective Services & Small Arms

- **Security Guard Services:** armed and unarmed
- **Technical Surveillance Counter-Measures**
- **Anti-Terrorism Services**
- **Small Arms**

Past Performance

USCENTCOM: Man-portable RF systems working flawlessly in remote, austere areas worldwide

USSTRATCOM / Joint Electronic Warfare Center (JEWEC): Various customized RF and satellite communications solutions

USSOCOM: Man-portable comms systems providing Push-to-Talk capability via satellite or cellular service – whichever is available. Designed to operate without any comms infrastructure.

USAF / Air Force Research Lab (AFRL): Man-portable RF monitor and broadcast system to automatically detect, classify and attack various RF waveforms. Training and offensive purposes.

US Dept of Treasury TIGT: Various small arms acquisition and support.
