## Differentiators

- Savvy military and intelligence field operators **able to deploy where you need us** for security and protection or to deploy EW equipment.
- Our innovative Electronic Warfare and mobile communications solutions work in battle in the most austere conditions.
- Lean, highly responsive provider focused on customer satisfaction.
- Specializes in high performance, low-cost, small SWaP-C solutions that leverage the world's most cutting-edge technology.

## Contact Information

**Kerberos International, Inc.**

19 North Main St, Suite 2711, Temple, TX 76501  
(254) 771-1080 | [Info@KerberosInc.com](mailto:Info@KerberosInc.com)

## Core Competencies

### Portable C<sup>4</sup>/ISR, Electronic Warfare and MILDEC Solutions

#### Customized, man-portable, communications solutions.

Robust remoteable, multi-function, multiband, full spectrum, communications, collection, direction finding (DF) and HF/VHF/UHF surveillance and attack systems. Support for cell phone, radio, satellite, Internet, video, GPS, RFID and specialized requirements. Ruggedized with optional trailers and capable of operating in the most austere environments using various power sources.

**Easy to use solutions used for mildec and training simulation purposes** to simulate cell phone networks, PTT networks, satellite phone conversations, radar and complete cyber networks including robust social media simulation capability.

**We focus on the tactical aspects of SWaP-C.**

### I/O Programs and Services

Kerberos has conducted information operations and community outreach programs in multiple countries throughout the NEMA region including Bahrain, Iraq (focus on Kurdistan), Libya, Somalia, Syria, and Yemen

### Tactical Cyber & ElectroMagnetic Warfare (EW) Services including R&D, Engineering and Systems Integration

Senior engineers provide advanced R&D, engineering, design, build, test and evaluation, implementation, and ongoing support of radio frequency (RF) communications solutions that range from large outdoor networks to small, handheld RF jamming devices.

### Professional Security and Protective Services for Federal & Commercial Facilities

- **Security Guard Services:** armed and unarmed security guard services for critical infrastructure, government facilities and commercial facilities ranging from office buildings to power plants and dams.
- **Badging, Credentialing and Administrative Services** including fingerprinting and badge issuance
- **Anti-Terrorism Programs**

## Representative Past Performance

**USCENTCOM:** Kerberos provides engineering design, build, and test of multiple electronic warfare platforms for USCENTCOM. Kerberos also provides a 24x7x365 help desk and monitoring service and, when necessary, deploys combat experienced electronic warfare veterans to install, operate and maintain these platforms in various areas throughout USCENTCOM's area of responsibility.

**Naval Air Station Patuxent River:** As a subcontractor to Rohde & Schwarz, Kerberos designed and built portable communications towers with 72' telescoping masts containing various radio and cell phone communications equipment.

**US Army Research Laboratory (ARL):** Kerberos provides R&D, engineering and design services for the development of a man-portable, tactical, intelligent radio frequency (RF) jamming system that will automatically classify and attack various RF waveforms.

**Department of Energy, Western Area Power Association and Bureau of the Interior—Armed Security Guard Services:** Kerberos provides armed security guard and alarm monitoring services for several DOE locations in Colorado, Arizona and California and for Parker Dam on Lake Havasu.

**US Air Force Research Laboratory (AFRL):** Kerberos provides R&D, engineering, and design for a futuristic infrastructure supporting tactical jamming of radio frequency (RF) waveforms that are expected to evolve in the next decade.

**USSTRATCOM / Joint Electronic Warfare Center (JEWIC) OPFOR Branch:** Kerberos provides various customized radio (RF) and satellite communications solutions, ruggedized electronic warfare (EW) trailers and radio system training.

**Edwards AFB:** Kerberos designed and built a portable communications tower with a 72' telescoping mast containing various surveillance and radio broadcast sensors.
